- Pred zagonom motorja preverite motorni prostor. Če opazite vodo v motornem prostoru, prižgite črpalko za izčrpavanje vode (bilge pump).
- Za zagon motorja potrebujete varovalno vrvico, ki jo zataknete na zatič.

- **Zelo pomembno je, da pritrdite eno stran vrvice na zatič, drugo pa na zapestje ali pas, kot je prikazano na fotografiji.** Če padete s čolna, bo to zagotovilo, da se bo motor izklopil.

- Pred odvezom plovila preverite, da so vse vrvi na čolnu.
